July 26, 1968

Mr. Hugh J. Menghi
Air Pollution Control Division
Water & Air Resources Commission
Dover, Delaware 19901

Dear Mr. Menghi:

We have your letter of July 22, 1968, approving in principle our proposed sanitary landfill operation for this plant.

You requested additional information on the following to satisfy your requirements:

1. Location on the landfill site where the different materials will be segregated. The attached map shows the landfill site with respect to the plant and adjacent area. A second chart shows an enlargement of the landfill site only, and on this we have indicated where the various materials will be placed.
2. The width of the working face will be 40 to 50 ft. The height of this face will be reduced from 15 ft. to 7-8 ft. under our new plan, recommended by Mr. Wilburn, to fill from below and make a new lift.
3. In accordance with your recommendation, we agree to cover the more readily oxidizable materials to a depth of 4 inches on the top and face.

Attached is a completed form indicating our desire to waive right to public hearing.

We hope this has clarified the questions you have raised regarding our landfill operation.

Thank you for your consideration in this matter.

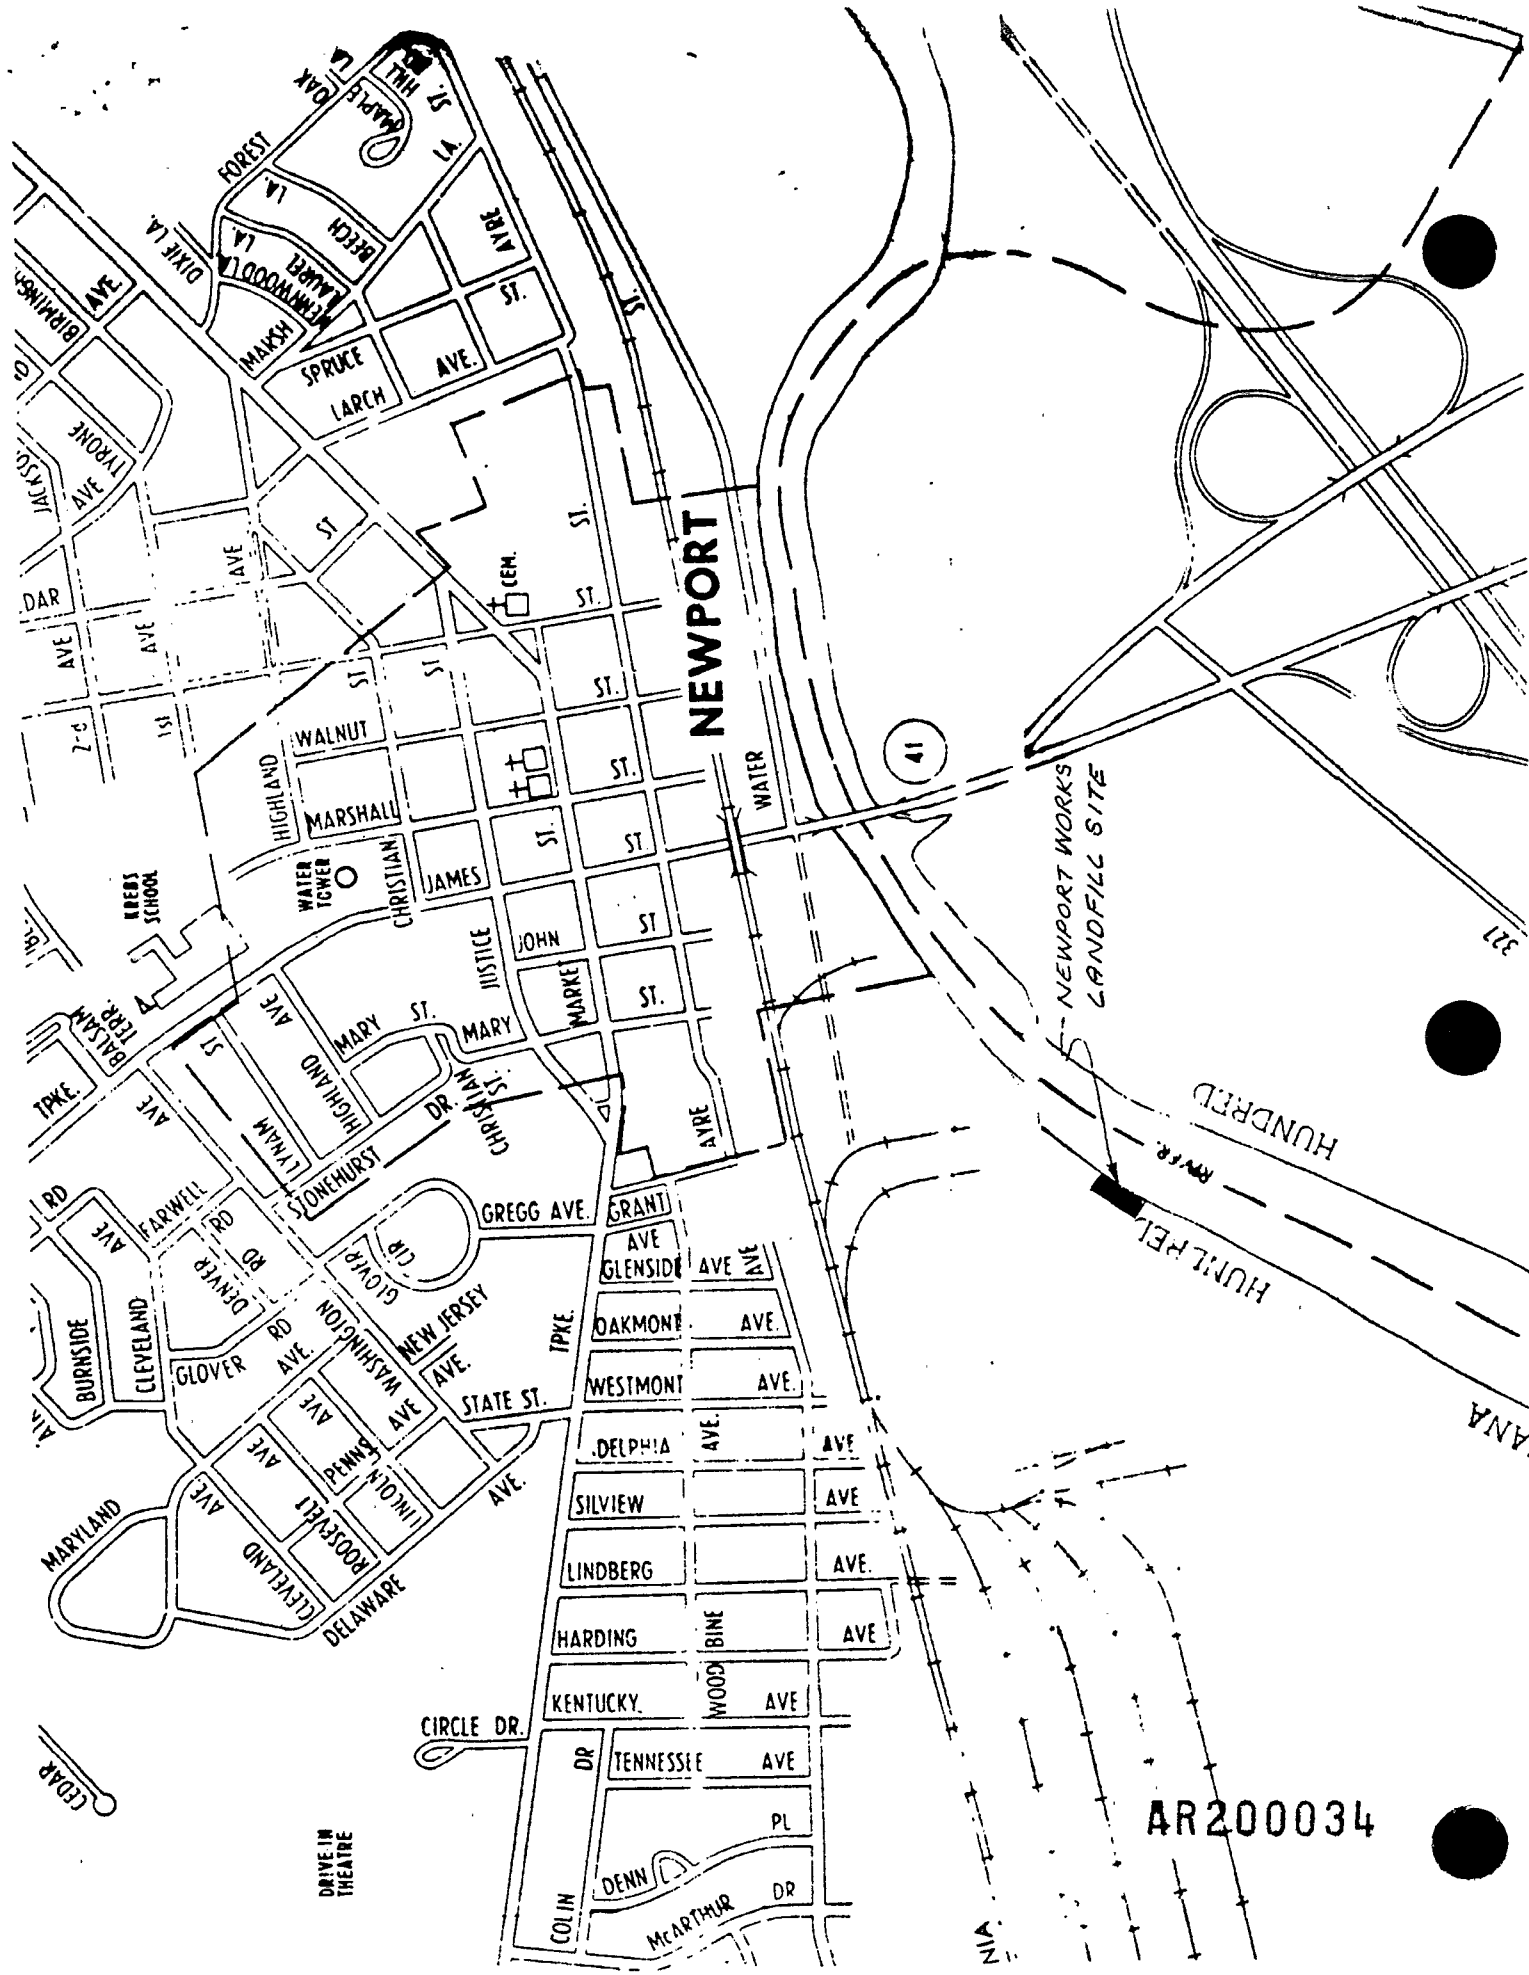

Very truly yours,

→ E. L. RODOWSKAS, PLANT MANAGER
